

Antamivi Points Calculation

Example: Alphamega (*Points are awarded only for every full €10 spent*)

How Points Are Calculated

Base Points:

- Debit card: 2 points per €10
- Bonus Points formula

Bonus Points = (Base points x promotion i.e. x10) – Base points

Pronomia Bonus (calculated on base points):

- Silver: +0 points per €10
- Gold: +2 points per €10
- Diamond: +4 points per €10

Credit card Bonuses (calculated on base points):

- Credit card: +4 points per €10

Campaign Bonuses (calculated on base points):

- X10: +18 points per €10
- When we apply a multiplier, the result already includes the base points.
- To keep things transparent, we show the bonus separately, so you can see exactly what extra you're earning.

Points earned through transactions are credited as whole numbers. Any decimal values resulting from the calculation are not added to the total

In case of multiple campaigns, the bonus points are added and not multiplied.

Purchase amount	Debit Card Base Points	Credit Card Bonus points	x10 Bonus Points	Pronomia Silver Bonus Points (x1.25)	Pronomia Gold Bonus Points (x2)	Pronomia Diamond Bonus Points (x3)
€10	2	+4	+18	+0	+2	+4
€20	4	+8	+36	+1	+4	+8
€100	20	+40	+180	+5	+20	+40

Pronomia Scenarios for €10 purchase with credit card:

- **Silver member:** 2+18+0=20
- **Gold member:** 2+18+2=22
- **Diamond member:** 2+18+4=24

For credit card purchases you get **+4 points**
