Η Τράπεζα Κύπρου Δημόσια Εταιρεία Λτδ («Τράπεζα Κύπρου») υποβλήθηκε στην άσκηση προσομοίωσης ακραίων καταστάσεων, η οποία διενεργήθηκε σε πανευρωπαϊκό επίπεδο για το 2011 από την Ευρωπαϊκή Τραπεζική Αρχή (ΕΤΑ), σε συνεργασία με την Κεντρική Τράπεζα Κύπρου (ΚΤΚ), την Ευρωπαϊκή Κεντρική Τράπεζα (ΕΚΤ), την Ευρωπαϊκή Επιτροπή (ΕΕ) και το Ευρωπαϊκό Συμβούλιο Συστημικού Κινδύνου (ΕΣΣΚ).

Η Τράπεζα Κύπρου σημειώνει τις σημερινές ανακοινώσεις της ΕΤΑ, της ΚΤΚ και του Υπουργείου Οικονομικών για την άσκηση προσομοίωσης ακραίων καταστάσεων σε πανευρωπαϊκό επίπεδο και αποδέχεται πλήρως τα αποτελέσματα της άσκησης.

Η άσκηση προσομοίωσης ακραίων καταστάσεων, στην οποία συμμετείχαν 91 τράπεζες καλύπτοντας πέραν του 65% του συνόλου του ενεργητικού του τραπεζικού συστήματος της Ευρωπαϊκής Ένωσης, αποσκοπεί στην αξιολόγηση της ανθεκτικότητας των Ευρωπαϊκών τραπεζών σε ακραίες κρίσεις και την φερεγγυότητα τους σε υποθετικές ασκήσεις προσομοίωσης υπό συγκεκριμένες περιοριστικές συνθήκες.

Οι υποθέσεις και η μεθοδολογία συστάθηκαν για την αξιολόγηση της κεφαλαιακής επάρκειας των τραπεζών σε σύγκριση με επίπεδο αναφοράς 5% για τον δείκτη κύριων βασικών ιδίων κεφαλαίων και αποσκοπούν στην αποκατάσταση της εμπιστοσύνης στην ανθεκτικότητα των εξεταζόμενων τραπεζών. Το ακραίο σενάριο καθορίστηκε από την ΕΚΤ και καλύπτει ένα διετές χρονικό ορίζοντα (2011-2012). Η άσκηση προσομοίωσης ακραίων καταστάσεων διενεργήθηκε υποθέτοντας σταθερό ισολογισμό ως 31 Δεκεμβρίου 2010 και δεν λαμβάνει υπόψη μελλοντικές επιχειρηματικές στρατηγικές και διοικητικές δράσεις. Επίσης δεν αποτελεί πρόβλεψη για τα κέρδη της Τράπεζας Κύπρου.

Ως αποτέλεσμα της υποτιθέμενης κρίσης, ο εκτιμώμενος ενοποιημένος δείκτης κύριων ιδίων πρωτοβάθμιων κεφαλαίων της Τράπεζας Κύπρου θα ανέλθει σε 6,2% το 2012 υπό το ακραίο σενάριο σε σύγκριση με 8,1% το τέλος του 2010. Λαμβάνοντας υπόψη τους παράγοντες μετριασμού που λήφθηκαν από την Τράπεζα, ο δείκτης εποπτικά αποδεκτών κεφαλαίων αυξάνεται σε 9,5%. Ο παράγοντας μετριασμού αφορά την έκδοση €887 εκατ. Μετατρέψιμων Αξιογράφων Ενισχυμένου Κεφαλαίου τον Μάιο 2011 τα οποία μπορούν να απορροφήσουν ζημιές στη βάση της συνεχιζόμενης δραστηριότητας.

Η άσκηση προσομοίωσης ακραίων καταστάσεων απαιτεί όπως για τα αποτελέσματα και τις αδυναμίες που εντοπίστηκαν, τα οποία θα ανακοινωθούν στις αγορές, γίνουν ενέργειες με σκοπό τη βελτίωση της ανθεκτικότητας του χρηματοπιστωτικού συστήματος. Με την ολοκλήρωση της πανευρωπαϊκής άσκησης προσομοίωσης ακραίων καταστάσεων, τα αποτελέσματα καταδεικνύουν ότι η Τράπεζα Κύπρου πληροί το κριτήριο του κεφαλαίου που είχε καθοριστεί για τους σκοπούς της άσκησης. Η Τράπεζα Κύπρου θα συνεχίσει να διασφαλίζει τη διατήρηση ικανοποιητικών επιπέδων κεφαλαίου.

Τα αποτελέσματα της άσκησης προσομοίωσης ακραίων καταστάσεων επαναβεβαιώνουν την ισχυρή κεφαλαιακή θέση της Τράπεζας Κύπρου, ακόμα και υπό τις πιο ακραίες και θεωρητικές συνθήκες προσομοίωσης. Τα αποτελέσματα επίσης εκφράζουν την προληπτική πολιτική του Συγκροτήματος για αποτελεσματική διαχείριση της κρίσης και τη λήψη των αναγκαίων μέτρων για τη διατήρηση επαρκών δεικτών κεφαλαίου, ισχυρής ρευστότητας και κερδοφορίας σε δυσμενείς οικονομικές συνθήκες.

Notes and definitions

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Regulatory transitional floors are applied where binding. RWA for credit risk have been calculated in accordance with the EBA methodology assuming an additional floor imposed at a level of RWA, before regulatory transitional floors, for December 2010 for both IRB and STA portfolios.

(5) Banks are required to provide explanations of what "Other operating income" and "Other income" constitutes for.

Composition of "Other operating income" and "Other income":

(6) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D as other mitigating measures.

(7) Net profit includes profit attributable to minority interests.

(8) Deferred tax assets as referred to in paragraph 69 of BCBS publication dated December 2010: "Basel 3 – a global regulatory framework for more resilient banks and banking systems".

(9) Stock of provisions includes collective and specific provisions as well as countercyclical provisions, in the jurisdictions, where required by the national legislation.

(10) Provisions for non-defaulted exposures to sovereigns and financial institutions have been computed taking into account benchmark risk parameters (PDs and LGDs) provided by the EBA and referring to external credit ratings and assuming hypothetical scenario of rating agency downgrades of sovereigns.

(11) For definition of commercial real estate please refer to footnote (5) in the worksheet "4 - EADs".

(12) Coverage ratio = stock of provisions on defaulted assets / stock of defaulted assets expressed in EAD for the specific portfolio.

(13) Loss rate = total impairment flow (specific and collective impairment flow) for a year / total EAD for the specific portfolio (including defaulted and non-defaulted assets but excluding securitisation and counterparty credit risk exposures).

(14) All elements are reported net of tax effects.

(15) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures".

Notes and definitions

(1) EAD - Exposure at Default or exposure value in the meaning of the CRD.

(2) The EAD reported here are based on the methodologies and portfolio breakdowns used in the 2011 EU-wide stress test, and hence may differ from the EAD reported by banks in their Pillar 3 disclosures, which can vary based on national regulation. For example, this would affect breakdown of EAD for real estate exposures and SME exposures.

(3) Breakdown by country and macro area (e.g. Asia) when EAD >=5%. In any case coverage 100% of total EAD should be ensured (if exact mapping of some exposures to geographies is not possible, they should be allocated to the group "others").

(4) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(5) Residential real estate property which is or will be occupied or let by the owner, or the beneficial owner in the case of personal investment companies, and commercial real estate property, that is, offices and other commercial premises, which are recognised as eligible collateral in the meaning of the CRD, with the following criteria, which need to be met:

(a) the value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro economic factors affect both the value of the property and the performance of the borrower; and

(b) the risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.

(6) Loan to value ratio - ratio of EAD to the market value of real estate used as collateral for such exposures. Given the different methodologies applied to assessing the value, the bank is required to explain the computation of the ratio. In particular (a) whether collateral values is marked-to-market or any other valuation method is used, (b) whether the amount has been adjusted for principal repayments, and (c) how guarantees other than the underlying property are treated.

Definition of Loan to Value ratio used: Balance of exposure / Open Market Value of Property (based on valuation carried out by Bank's accredited valuers)

(7) Total exposures is the total EAD according to the CRD definition based on which the bank computes RWA for credit risk. Total exposures, in addition to the exposures broken down by regulatory portfolios in this table, include EAD for securitisation transactions, counterparty credit risk, sovereigns, guaranteed by sovereigns, public sector entities and central banks.

Notes and definitions

(1) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(2) The exposures reported in this worksheet cover only exposures to central and local governments on immediate borrower basis, and do not include exposures to other counterparts with full or partial government guarantees (such exposures are however included in the total EAD reported in the worksheet "4 - EADs").

(3) According to the EBA methodologies, for the trading book assets banks have been allowed to offset only cash short positions having the same maturities (paragraph 202 of the Methodological note).
